

Environmental Policy

Stewart Signs Limited print and install self-adhesive graphics and signage primarily for the road fleet, rail and marine industries.

We operate a programme of continual improvement in our environmental performance and pollution prevention, aiming to minimise the environmental impacts resulting from our activities.

We will ensure that the company complies with all relevant environmental legislation, regulations and any other requirements to which the company subscribes.

We have systems and procedures to control and reduce atmospheric emissions, the consumption of energy and minimise waste, reusing and recycling where practical.

Improvements in our environmental performance will be achieved by maintaining an environmental management system that complies with BS EN ISO 14001, identifying and implementing improvement opportunities to enhance our environmental performance.

This policy has been communicated to all employees and contractors; it is also available to all interested parties on request from the company office at Chandler's Ford Industrial Estate, Eastleigh.

Signed

(QHSE Director)
